

**VACUUM CHUCK HEATED PLATES**  
**Compact Design – Round Heated Surface**  
**Thin Films – Wafers – Membrane Heating and Drying Applications**  
**Remote Control - Max. Temperature 250 °C**  
 Model family: **HTP-MB2-250-PRF**

## Description.

**THERMANSYS HTP-MB2-250 PRF Vacuum Chuck Heated Plates** family was designed to provide accurate and uniform surface temperature control up to 250C. Ideal choice for heating thin film substrates, wafers or flexible thin membranes. Controlled and monitored through a flexible conduit by a remote control box.

**HTP-MB2-250** series heated surface area is circular, suitable for round shape loads. Available at 6, 8, 10,12 and 14 inches diameter. The heated surface equal with the device footprint. The heated body is made from Aluminum providing superior heat transfer and temperature uniformity. A perforated anodized Aluminum plate on top of the heated body allows for air suction through the holes. This way keep the heat treated substrate attached uniformly with the heated surface enhancing significantly the heat transfer. The perforated plate is detachable for easy cleaning. The outer shell of the heated plate body is made of corrosion-free stainless steel ASTM 304.

A Pt100 temperature sensor is measuring directly the heated surface temperature. A PID algorithm is maintain accurately the user selected temperature or temperature profile program.

A hose connector at the bottom side of the hot plate allows for an external pump connection. The **HTP-CPU-A3** control box provide a power output for the pump. The on-off operation of the pump can be controlled though the system interface.

**HTP-MB2-250** compact series design protect the internal electrical components against possible liquid spillage on top of the heated surface.

Suitable for many applications including Electronics/Semiconductors, Pharmaceuticals/Cosmetics, Plastics, Agricultural and other.

- **Standard equipped with a Digital LCD display temperature remote controller -15 step programming with 1 program storage.**
- **USB port available for connection with a computer – Pyrologism 2.0 software available.**

## Specifications.

- Temperature control range, 5 °C above ambient to 250 °C. Monitoring resolution 0.1 °C.
- Operating Power: 230VAC – 50/60Hz. (115VAC on request / maximum power is restricted to 1600W)
- Pt100 type temperature sensor.
- Temperature control setting resolution 0.1 °C. Typical control fluctuation ±0.1 °C PID control.
- Burst firing insures silent operation and compliance with EMC standards.
- Heater galvanic isolation relay. Heater failure, thyristor failure, temperature sensor failure, alarms and interlocks.

### Optional features:

- Specially designed PYROLOGISM 2.0 software, for remote control from a Computer  
**Add suffix \_TSC**
- Sealing feed-through for operation inside sealed Glove Box chamber, Vacuum rating 10-3 torr (mmHg), pressure rating 0.5 bar Gauge
  - ✓ Feedthrough flange: DN25 CF/ DN40 CF  
**Add suffix: \_FT25CF/ \_FT40CF**
  - ✓ Feedthrough flange:DN25KF/ DN40 KF  
**Add suffix \_FT25KF/ \_FT40KF**
